# Vietnam responses to Avian Influenza: constraints and issues at local and international levels

## ■ Synthesis of different studies conducted in Vietnam

- Vietnam policies to face AI The logo for AIRD (Agence Française pour le Développement) features the acronym 'AIRD' in orange with a blue dot above it, followed by the word 'l'agence' in blue script.The logo for CNRS (Centre National de la Recherche Scientifique) features the acronym 'CNRS' in blue with a white 'C' and 'R' intertwined, and the text 'CENTRE NATIONAL DE LA RECHERCHE SCIENTIFIQUE' in small letters below.The logo for Malica (Méthodes et Logiques pour l'Inventaire et la Connaissance des Animaux) features the acronym 'Malica' in purple with a blue 'M' and 'a' intertwined.
- Risk perception by urban consumers
- Impact of AI on avian supply chain (Gripavi)

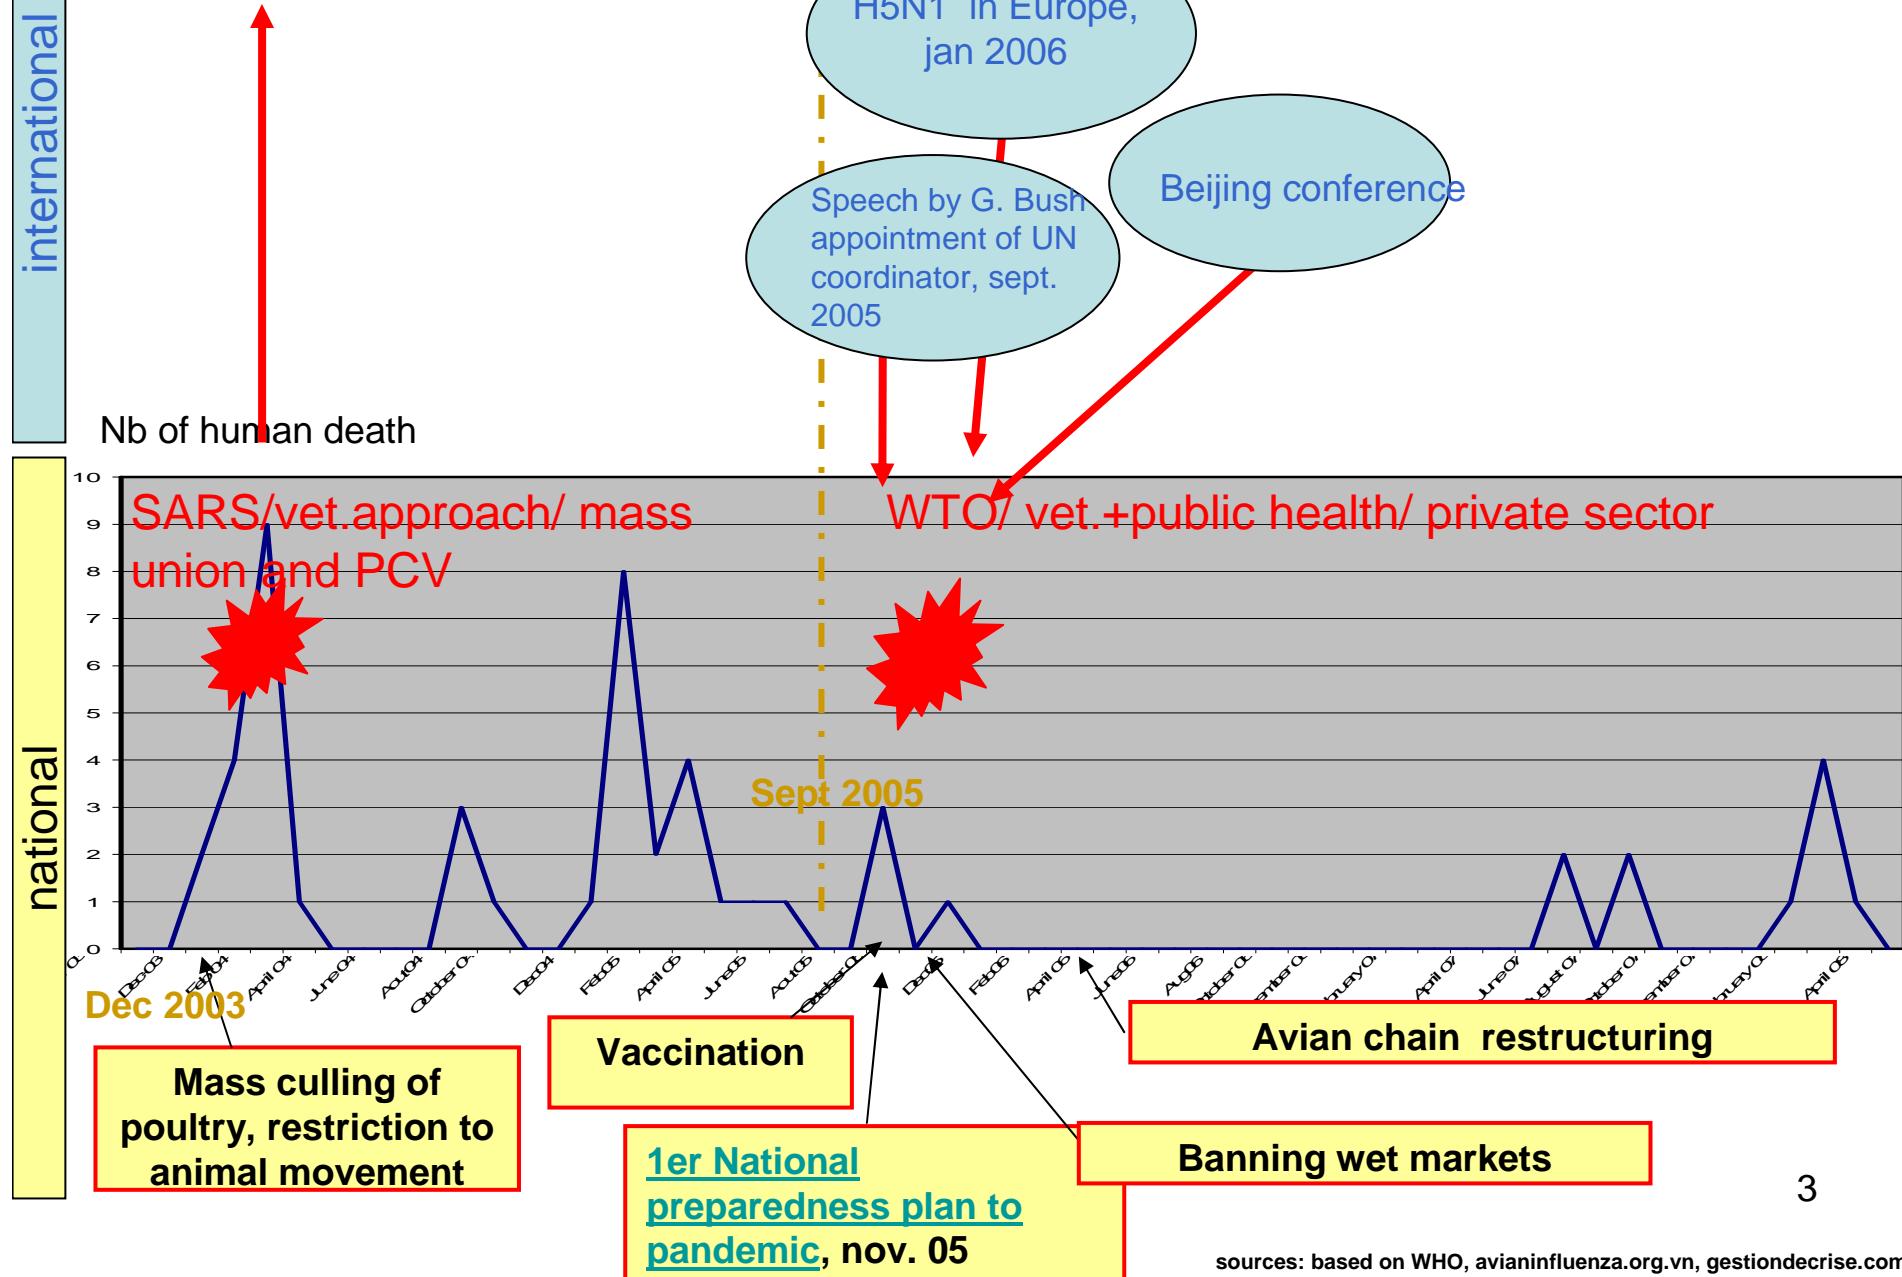

## ■ Researchers

- Dang Duc Chien, Desvaux Stéphanie, Figuié Muriel, Fournier Tristan, Hoang Vu Quang, Moustier Paule, Nguyen Minh Huong, Tran Thi Tham.

## « Protectionism »: stockpiles of anti-viral drugs and masks

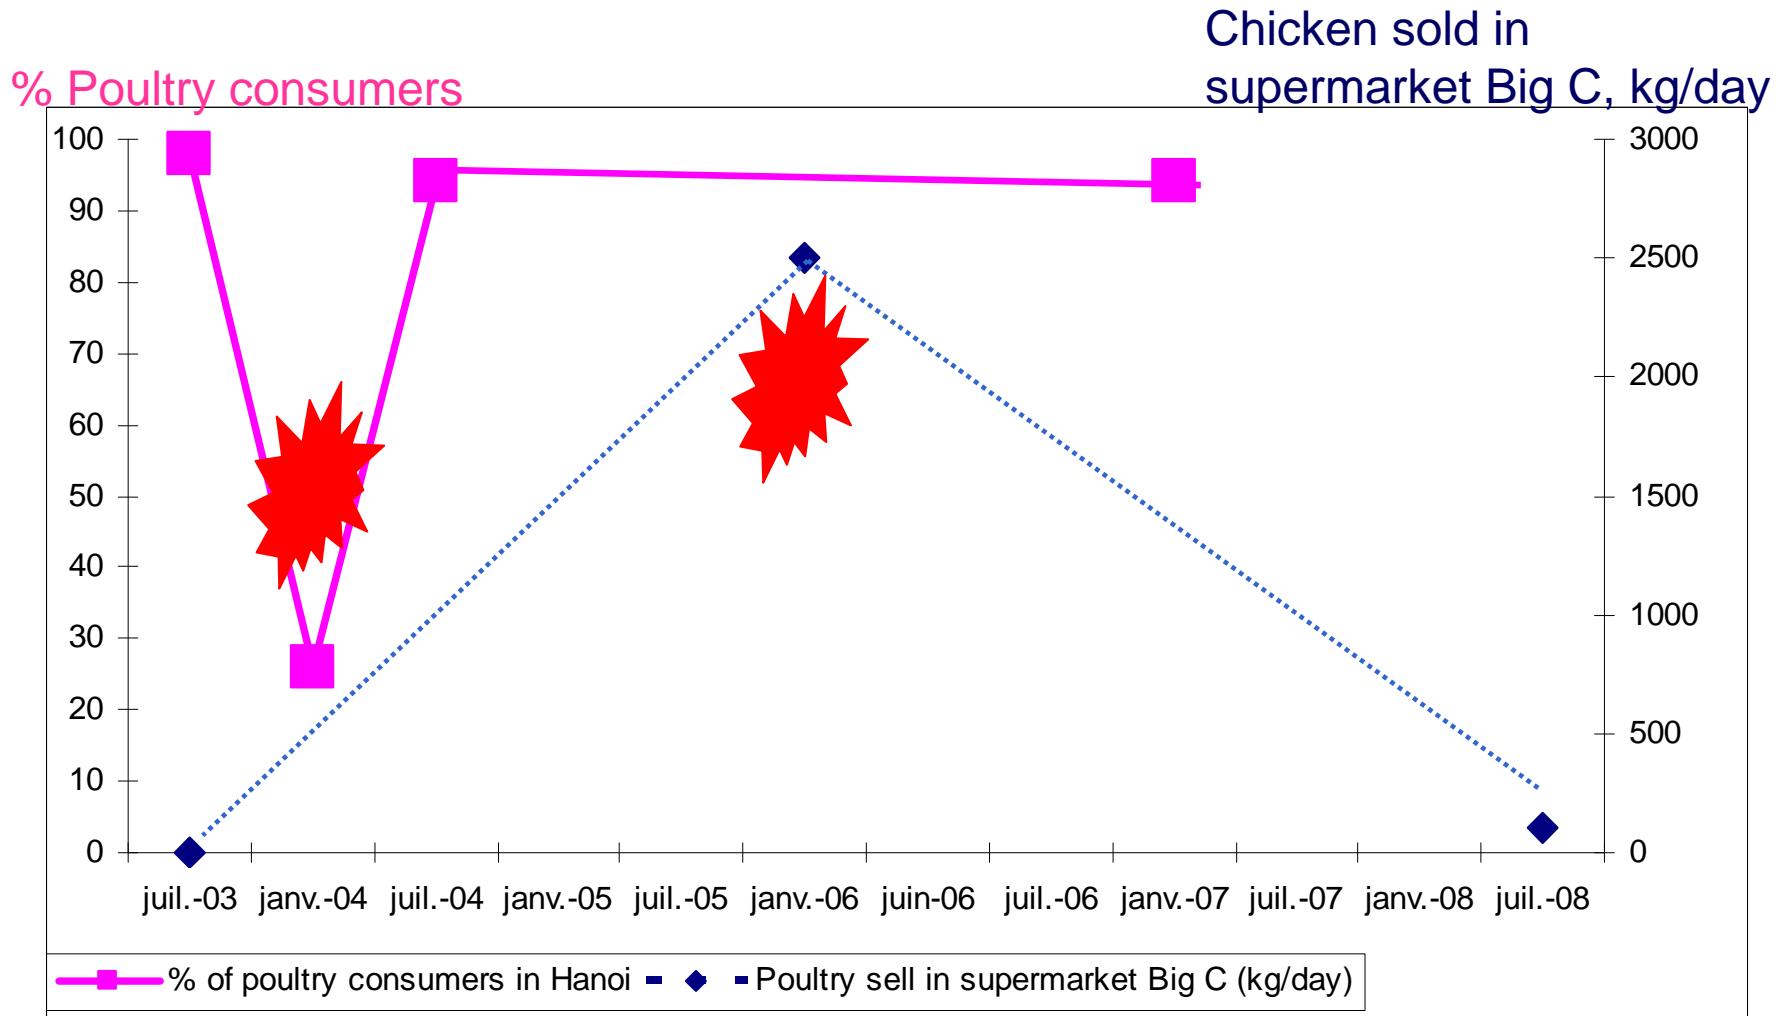

# Scale-up of international responses, US and UE mobilisation: controlling AI at the source

# Vietnamese urban consumers: little attention given to this stakeholder

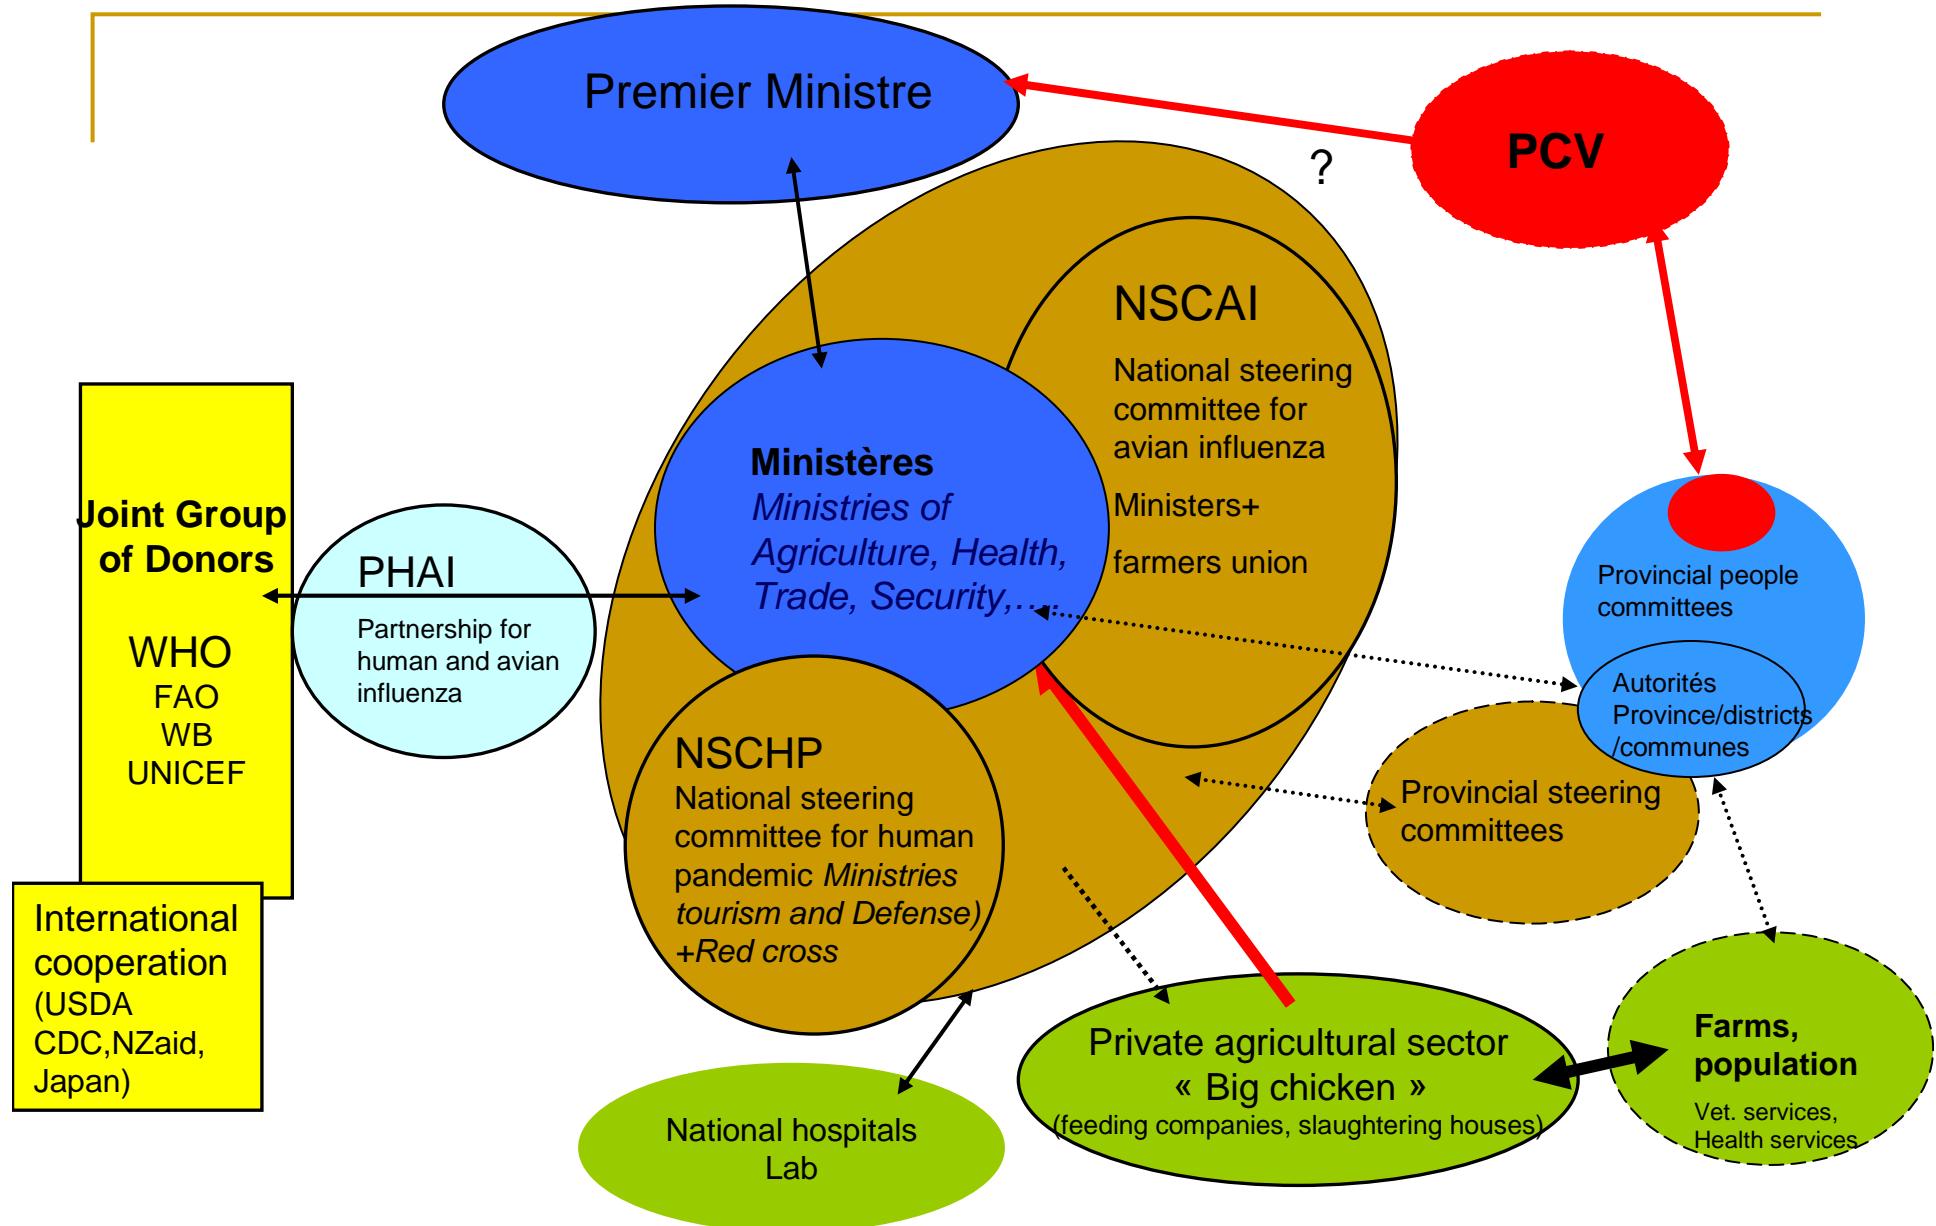

- In general
  - two opposite visions of consumers: over reactive population (developed countries)/ “invisible” group (developing countries)
  
- In Vietnam
  - Farmers, consumers,...: a need for education and behaviour change (top down approach: Unicef, KAP)
  - Private sector: consumers fear= a window of opportunity “safe chicken”

# Hanoi consumers reactions

# Conclusion

- Vietnam response: transparency and sovereignty. A « good global citizen ».
- Private sector: a narrow window of opportunity for slaughter houses and supermarkets...but probably more long term effect on the upstream of the avian chain.  
*« Avec la grippe aviaire, le malheur des uns fait le bonheur des autres. Là, ça fait le bonheur des intégrateurs. Le schéma classique quoi... »*
- A need to consider laymen strategies for risk management.

## Dispositif institutionnel de gestion de la grippe aviaire au Vietnam (2008)
